

New Mexico Health Information Collaborative (NMHIC)

Presents
The Fourth Annual HIE Users' Conference

Sharing Health Information Success Stories:

Empowering Partners in Health Care

November 22, 2019

8:00 am – 5:00 pm

Join us in person at
Indian Pueblo Cultural Center
2401 12th St. NW
Albuquerque, NM 87104

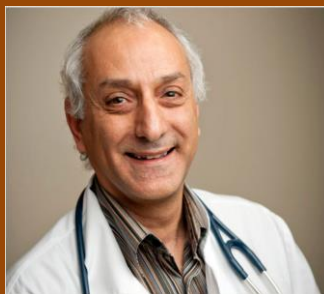

Ask your local hospital or association to host a simulcast in your area.

The New Mexico Health Information Collaborative (NMHIC), your statewide health information exchange (HIE), invites you to share our vision of **“Perfectly Informed Health Care”** for all New Mexicans, regardless of where the care is provided.

Who Should Attend?

- Physicians and mid-level providers in any size or type of practice
- Staff, e.g., nurses, medical assistants, case managers, and others
- Inpatient, outpatient, and emergency personnel
- Payers, Insurers, and Self-insured employers
- Quality Assurance administrators
- Office and practice managers
- Health IT professionals
- Public Health professionals

Keynote by **Allen Ausford, MD FCFP**, Clinical Professor, Department of Family Medicine, University of Alberta; and former CMIO of Alberta Health Services, who helped to establish and is an active user of Alberta Netcare, a very successful HIE in Alberta, Canada.

Supported in part by:

Why Attend?

Participants will:

- Hear about the many ways health information interoperability is being leveraged to improve health care in our state, the surrounding states, and across the nation
- Discuss emerging health information technologies, payment incentives, and regulations
- Hear about health information initiatives at the state level
- Identify “interoperability roadblocks” and brainstorm ways to remove barriers

Our 2019 Speaker Lineup:

Welcome from our 2019 Conference Chair

Dale Alverson, MD
CMIO LCF Research/NMHIC
Strategic Telehealth Consultant, UNM Center
for Telehealth

Keynote – An HIE Success Story

New Mexico Health Information Collaborative

Health Information Exchange (HIE) is an important tool to help you be successful in reducing redundant tests and procedures, facilitating efficient transitions of care, making diagnoses and care decisions based on more complete patient information at the point of care, and in supporting new accountable care and patient-centered medical home care models.
