New Mexico Health Information Collaborative (NMHIC) Presents
The Second Annual Users’ Conference

Brainstorming Innovative Health Information Processes:
Taking command of our crucial roles in shaping the future of healthcare information interoperability in New Mexico

Saturday, November 4, 2017, 8:15 am – 4:30 pm
EC Council North America, 101C Sun Avenue NE, Albuquerque New Mexico
(Just off of San Francisco Road, between Jefferson and the Pan American Fwy.)

“Even though we may work for different organizations with different internal priorities and hold different perspectives, I believe we all share the common goal of and responsibility for improving the health of our patients and communities – and, frankly, working together to achieve that goal has never been more important for all of us than it is today.” ~ 2017 Conference Chair, Timothy Washburn RN, BSN, MBAHM, Memorial Medical Center

Who Should Attend?
• Physicians and mid-level providers in any size or type of practice
• Staff, e.g., nurses, medical assistants, case managers, and others
• Inpatient, outpatient, and emergency personnel
• Payers, Insurers, and Self-insured employers
• Quality Assurance administrators
• Office and practice managers
• Health IT professionals
• Public Health professionals

Why Attend?
NMHIC presents its second annual conference to advance the cause of healthcare information exchange in New Mexico by helping participants create a shared vision, examine the current state of interoperability and factors hindering it, build consensus on standards, and formulate strategies for overcoming barriers to information exchange. The New Mexico Health Information Collaborative (NMHIC), your statewide health information exchange, invites you to attend our second annual HIE Users’ Conference to participate in meaningful presentations and thoughtful discussions about the benefits, challenges, and solutions for interoperability and exchange of health information in New Mexico and surrounding communities.
About NMHIC

Health Information Exchange (HIE) is an important tool to help you be successful in reducing redundant tests and procedures, facilitating efficient transitions of care, making diagnoses and care decisions based on more complete patient information at the point of care, and in supporting new accountable care and patient-centered medical home care models.

Our Keynote Presenter - Deb Bass, Chief Executive Officer
Nebraska Health Information Initiative (NeHII)

Ms. Bass will present the *Current State and Future Direction of Interoperability* to set the stage for a highly-interactive day of thoughtful presentations, discussion, and problem-solving around interoperability in New Mexico. As a former surgical nurse, IT consultant, and current CEO of her state's health information exchange, Ms. Bass brings her unique perspective and a wealth of knowledge based on years of experience in the healthcare industry to inspire and motivate us to work across organizations to improve patient care.
